

ABSTRACT

An information record medium contains video information indicating main-video, sub-video information indicating sub-video
5 which can be displayed at least partially over the main-video, and sub-video control information. The sub-video control information includes (i) sub-frame range information specifying at least a part of the region in the sub-video as a sub-frame and (ii) shadow display control information for selectively adding a shadow to a sub-video
10 portion in the sub-frame according to an alpha value indicating the transparency in the sub-video portion and displaying the sub-video portion to which the shadow is added over the main-video.
